

Manufacturing Engineer Technician II

[Apply Now!](#)

Are you passionate about technology and ready to put your combined inquisitive mindset, aptitude for problem solving, and technical skills to work for a dynamic company? Are you looking for a career and, most importantly, a company you can grow with? Join Epson Portland Inc. today and help build a better tomorrow. We are in the midst of an exciting year and are looking for a candidate that is ready to grow with us!

Epson Portland Inc. is looking for a **Manufacturing Engineering Technician** to join our Cleanroom Department. We're looking for an experienced independently minded technician who can analyze machine efficiency by inspecting and troubleshooting electro-mechanical and pneumatic automated production equipment.

In this role you will be supporting production activities such as testing, inspection, and modification of assembly and test equipment. The ideal candidate will also conduct engineering tests/experiments to collect data and recommend methods or actions to remedy issues.

Shift: A Shift / Sun – Tues/Wed / 4:45am – 4:45pm

Responsibilities

- Perform testing and troubleshooting based on production and engineering documentation
- Direct production equipment set-up
- Investigate and identify production processes and efficiency problems; recommends improvements
- Develop documentation for workmanship standards and assembly drawings
- Conduct engineering tests and evaluations to collect data or assist in research work
- Analyze machine performance using historical data to make suggestions for improving product quality
- Assist Equipment Technicians in qualifying part quality after machine adjustments and in addressing machine issues
- Conduct true cause analysis on a variety of issues
- Develop proactive plans to reduce failures
- Develop plans to reduce cost and/or increase efficiency
- Follow and enforce company-wide safety programs including lock out/tag out procedures, and ensures safety guards are in place and in proper working order

Education, Training, and Skills

- AA degree or equivalent experience preferred

- 2 years related experience in a manufacturing or engineering environment preferred
- Knowledge and application of quality tools and data collection
- Proficient PC skills including word processing, spreadsheets, and email
- Ability to read and understand production and engineering documentation
- Strong written and verbal communication skills including technical documentation
- Strong analytical and problem solving skills
- Ability to use specialized diagnostic equipment
- Basic Project Management skills

At Epson Portland Inc., your input matters. We pride ourselves on inclusion, diversity, and individuality as our innovations come from our differing perspectives. We're steadfast in our commitment to quality, environmental conservation, and developing options and solutions for the Seiko Epson Group. Whether you've been here two weeks or twenty years, you can have an impact on the business and enjoy growth and fulfillment in your career at Epson Portland Inc. Many of our team members have been with us more than twelve years and have deep organizational knowledge to share. Founded in 1986, Epson Portland Inc. is located in Hillsboro, Oregon.

We offer an outstanding benefits package, including:

- Comprehensive, low-cost medical, dental, vision, alternative care, and prescription drug coverage
- Generous paid time off, including sick time, vacation, and holidays
- Income protection plans, including life insurance and disability programs
- Financial security plans including a 401(k) retirement plan with company matching
- Additional benefits such as educational reimbursement, an employee assistance program (EAP), employee discounts and much more

To be considered for this position, please send a cover letter with salary requirements and a resume in Word or PDF format. Reference Requisition #8742.

Pre-employment drug screening is required.
Epson Portland Inc. is an Equal Opportunity Employer.
